

HermansonAhead

Powered by PerformanceCore

Reliable HVAC for Dependable Care

Maximize Uptime • Control HVAC Costs
Protect Patient Comfort

A UNIFIED PERFORMANCE FRAMEWORK

HermansonAhead unites DST diagnostics and ThermaClear® treatment into one performance-management framework, reducing operational risk and bringing clarity to capital planning across every building in your system.

Why HVAC Efficiency Is Critical in Patient Care

- Peer-reviewed analysis confirms heating & cooling account for ~45-69% of hospital energy demand.
  Applied Energy, 2024
- The CDC notes that poorly maintained HVAC systems can increase the risk of airbone infection spread - a growing focus area in Joint Commission and CMS environment-of-care reviews.
  CDC, Infection Control - Environmental Control of Air
- Temperature & air quality impact patient recovery times and staff performance, influencing overall care quality.
  ASHRAE

DST
DISCOVERY SOUND TECHNOLOGY

Precision Diagnostics

Identify issues before they become failures.

OPERATIONS IMPACT - FACILITIES TEAMS

- Detect mechanical degradation in real time. Including in critical spaces that can't tolerate surprise downtime
- Pinpoint exactly which assets need attention across every building in your system.

CAPITAL IMPACT - FACILITIES LEADERSHIP

- Focus maintenance dollars where they deliver the greatest impact
- Replace guesswork with lifecycle data before capital budgets are set

Smarter diagostics → Controlled Maintenance → Confident decisions

ThermaClear®

Performance Restoration & Protection

A One-time, permanent treatment.

OPERATIONS IMPACT - FACILITIES TEAMS

- Restores lost efficiency by removing oil-fouling, supporting the continuous, 24/7 operation hospitals depend on
- Super-lubricates the compressor and extends equipment life

CAPITAL IMPACT - FACILITIES LEADERSHIP

- Helps delay costly equipment replacement
- Protects long-term capital plans and reduces deferred-maintenance liability

Protect your HVAC investment. Lower your Costs. Protect patient care.
